Requirement Checklist (ALL MUST BE CHECKED AND VERIFIED BY PERSON SUBMITTING APPLICATION)

This research study is an observational review of Advanced Heart Failure Patients (HF, VAD, Heart Tx) at the University of Utah Hospital and SLC VAMC patient clinical outcomes in relation to their heart failure therapy.

This research presents no more than minimal risk to participants.

This research does not require patient consent.

This research involves NO direct contact with patients.

This research involves no study-only related testing or procedures.

This research involves no changes in standard of care for patients.

This research involves the collection or study of existing data, documents, records, pathological specimens, or diagnostic specimens.

Subjects in this research cannot be identified directly or through identifiers linked to the subjects.
